PORTFOLIO OBJECTIVE & STRATEGY

The All Weather NCIS Equity Fund is a general equity portfolio that seeks to sustain high long-term capital growth for investors.

INVESTMENT PROFILE

The portfolio is a general equity fund and will invest in a broad spectrum of South African and offshore securities. The investments to be included in the portfolio may comprise a combination of securities such as equities, notes, ETF's, ETN's, Property Linked Units, REIT's deposits, money market instruments, bonds, loan stocks, debentures, securitized debt and notes in accordance with the provisions of the Act. The manager may invest in participatory interests or any other form of participation in portfolios of collective investment schemes or other similar collective investments schemes as the Act may allow from time to time, and which are consistent with the portfolio's investment policy. Where the aforementioned schemes are operated in territories other than South Africa, participatory interests or any other form of participation in portfolios of these schemes will be included in the portfolio only where the regulatory environment is, to the satisfaction of the manager and the trustee, of sufficient standard to provide investor protection at least equivalent to that in South Africa. The portfolio may from time to time invest in listed and unlisted financial instruments, in accordance with the provisions of the Act, and the Regulations thereto, as amended from time to time, in order to achieve the portfolio's investment objective. The manager may also include forward currency, interest rate and exchange swap transactions for efficient portfolio management purposes. The portfolio equity exposure will be a minimum of 80% of the portfolio's net asset value. For further fund limits, please refer to www.allweather.co.za.

ASSET ALLOCATION

RISK PROFILE

Low

Medium

High

*High Risk:

This portfolio has a higher exposure to equities than any other risk profiled portfolio and therefore tend to carry higher volatility due to high exposure to equity markets. Expected potential long-term returns are high, but the risk of potential capital losses is high as well, especially over shorter periods. Where the asset allocation contained in this MDD reflect offshore exposure, the portfolio is exposed to currency risks, therefore, it is suitable for long term investment horizons.

PORTFOLIO FACTS

Benchmark	FTSE / JSE Shareholder Weighted (SWIX) Index
Inception Date	September 2017

PERFORMANCE INFORMATION

Fund vs. Objective

FUND MONTHLY PERFORMANCE

Fund vs. Objective

Net Monthly Performance Since Inception*

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD
2017									-0.89%	6.81%	1.88%	-0.56%	7.24%
2018	0.19%	0.46%	-3.57%	3.18%	-4.66%	2.35%	0.86%	1.26%	-5.02%	-5.79%	-0.08%	1.74%	-9.21%
2019	3.51%	0.90%	-0.16%	5.87%									10.39%

The graph above reflects the actual cumulative percentage performance of the portfolio and notional performance of the benchmark, based on a lump sum contribution on the launch date of the portfolio. Performance is shown net of all portfolio charges and expenses and includes the reinvestment of distributions.

Performance Calculations

The performance calculated and shown is that of the portfolio. Individual investor performances may differ as a result of initial fees (if applicable), the actual investment date, the date of reinvestment and dividend withholding tax. Where periods of longer than one year are used in calculating past performance, certain figures may be annualised. Annualisation is the conversion of a rate of any length of time into a rate that is reflected on an annual basis.

Total expense ratio – FSCA requirement:

One year, as at financial year-end, as per Board Notice 92 of 2014

Period (annualised)	01 June 2017	to	31 July 2018
Distributing	Total Expense Ratio (TER)	Transaction Costs (TC)	Total Investment Charges (TER + TC)
	0.59%*	1.10%*	1.69%*
	of the value of the fund was incurred as expenses relating to the administration of the fund.	of the value of the fund was incurred as costs relating to the buying and selling of the assets underlying the fund.	of the value of the fund was incurred as costs relating to the investments of the fund.

INFORMATION AND DISCLOSURE - CIS LONG ONLY PORTFOLIOS

General Long Only

Collective Investment Schemes (Unit Trusts) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending (i.e. borrowing and lending of assets). The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. The ability of the portfolio to repurchase, is dependent upon the liquidity of the securities and cash of the portfolio. A manager may suspend repurchases for a period, subject to regulatory approval, to await liquidity, and the manager must keep the investors informed about these circumstances. The manager does not provide any guarantee, either with respect to the capital or the return of a portfolio. Different classes of participatory interests apply to these portfolios and are subject to different fees and charges. A schedule of all fees and charges, inclusive of VAT and maximum commissions, is available on request from us or from your financial adviser. Forward pricing is used. For portfolios that include derivatives, there is no assurance that a portfolio's use of a derivative strategy will succeed. A portfolio's management may employ a sophisticated risk management process, to oversee and manage derivative exposures within a portfolio, but the use of derivative instruments may involve risks different from, and, in certain cases, greater than, the risks presented by the securities from which they are derived. Foreign securities within portfolios may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Investors are reminded that an investment in a currency other than their own may expose them to a foreign exchange risk.

Prices

The latest prices and TER are published daily in the Cape Times Business Report and are made available on our website www.allweather.co.za.

Performance fees

The portfolio charges a performance fee of 20% of the amount by which it outperforms the hurdle rate [SteFi]. The performance fee is payable annually and calculated over a 3 year period. The High-Water Mark principle is applied in the performance fee calculation. The PERFORMANCE FEE FAQ DOCUMENT is available on request and our website www.allweather.co.za.

Performance returns

Recurring investment performance returns are being quoted. Income distributions, prior to deduction of applicable taxes, are included in the performance calculations. NAV to NAV figures have been used for the performance calculations, as calculated by the Manager at the valuation point defined in the deed, over all reporting periods. Investment performance calculations are available for verification upon request by any person. Reinvestment of income is calculated on the actual amount distributed per participatory interest, using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date. The performance is calculated for the fee class B2. The individual investor performance may differ, as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The rate of return is calculated on a total return basis, and the following elements may involve a reduction of the investor's capital: interest rates, economic outlook, inflation, deflation, economic and political shocks or changes in economic policy. Annualised returns are period returns re-scaled to a period of one year. This allows investors to compare returns of different assets that they have owned for different lengths of time. All period returns greater than one year have been annualised. Returns for periods less than one year have not been annualised. A cumulative return is the aggregate amount an investment has gained or lost over time, independent of the period of time involved. Actual annual figures are available to the investor on request.

Valuations and transaction cut-off times

The portfolio is valued daily at 15h00. The Pricing Date is the daily. The daily cut-off for receipt of instructions is 14h00. No instruction will be processed unless all requirements have been met and supporting documentation has been provided. Instructions received before the cut-off will be processed the same day and will receive the same day's price. Instructions received after cut-off will be processed the next business day. Redemptions are paid out within five business days.

Additional information

For additional information on the portfolio, refer to the following documents, available on our website www.allweather.co.za, from your financial adviser, or on request from the Manager, free of charge.

Complaints and conflicts of interest

The complaints policy and procedure, as well as the conflicts of interest management policy, are available on our website www.novare.com. Associates of the manager may be invested within certain portfolios, and the details thereof are available from the manager.

Closure of the portfolio

The manager has the right to close certain portfolios to new investors, in order to manage them more efficiently, in accordance with their mandates.

Third party named portfolios

For the third party named portfolios, the manager has entered into a co-named agreement with the third party. The manager retains full legal responsibility for the third party named portfolio. The assets of the portfolio are managed by an external financial services provider (FSP), being the investment manager. For co-named portfolios, the FSP has no intention of becoming a manager. There may be potential conflicts of interest, which must be managed in accordance with the conflicts of interest management policy.
